Education

2024

Informatics Engineering
Kaunas University Of Technology

Functional / technical skills

- JavaScript, TypeScript
- PHP
- Java
- C#
- HTML
- CSS, SCSS
- Dart
- React.JS
- Spring
- ASP.NET Core
- Flutter
- MySQL, PostgreSQL
- Jira, Trello
- Git

Language

Lithuanian

English

Motiejus Šlimas

Full Stack Developer

Project experience

Traveling advertisement and search app

02/2024 - 06/2024

Full Stack Developer

For his final university project, he developed a travel advertisement and search app. He utilized the Spring framework for backend development, focusing on user authentication and data management, while creating a seamless frontend with React.js. Additionally, he organized MySQL database relationships and managed API endpoints.

Technologies: Dart, Flutter, Spring, MySQL

Lost and found items app

11/2023 - 12/2023

Full Stack Developer

Working as a developer, he contributed to building a lost and found web app that utilized maps and coordinates. His focus primarily revolved around utilizing Spring for backend tasks while constructing the frontend with React.js. Additionally, he played a key role in organizing the MySQL database relationships, managing endpoints, designing the user interface, and structuring the database layout for the application.

Technologies: React.JS, TypeScript, Spring, MySQL

Electric Vehicle Charging Station App

01/2023 - 06/2023

Full Stack Developer

He developed an API for electric vehicle routes that intelligently factored in charging station availability, when necessary, primarily focusing on backend development using the Express.JS library. Additionally, he contributed to the creation of a mobile application using Dart for this purpose.

Technologies: Dart, Flutter, Express.JS, MySQL

Clicker-based web game

09/2021 - 01/2022

Full Stack Developer

He primarily focused on developing a clicker-based PHP/JavaScript game, concentrating extensively on the implementation of login/registration functionalities using sessions, handling database operations, and various related tasks.

Technologies: HTML, CSS, PHP, JavaScript, MySQL

Work experience

MB "Aguru", Kaunas

02/2024 - 05/2024

Full Stack Internship

In his internship, he worked on designing and fixing the components assigned to him. He contributed to multiple design aspects and ensured everything functioned properly.

Technologies: React.JS, TypeScript, ASP.Net Core

Energy Advice, Kaunas

06/2022 - 08/2023

WEB Junior developer

He developed datasets related components and charts for the company's web application using React.JS and TypeScript, collaborating with the team to design interactive and responsive user interfaces, ultimately enhancing the overall user experience.

Technologies: React.JS, TypeScript, CSS
